# Firefox has been updated

Update FireFox

# Stopped FTP service

1. Control Panel
2. Administrative Tools
3. Services
4. Look for any noncritical services that are running

5. Stop Microsoft FTP Service and change startup type to Disabled

## **Windows Defender Firewall enabled**

Use recommended settings

If it doesn't work, there's probably something wrong with the group policy settings that are preventing you from making an edit

## **Look for “bad,” “non-work” related files**

```
dir \users\*.mp3 /s
```
